

**CALCONNECT DOCUMENT CD 0904**

**Type:** Proposal  
**Title:** iCalendar XML Representation  
**Version:** 1.0  
**Date:** 2009-06-04  
**Status:** Published  
**Source:** XML Technical Committee

This document was submitted to the IETF as an Internet Draft for the Standards Track as of the date shown above, and may be found at the following URL:

<http://ietfreport.isoc.org/idref/draft-daboo-et-al-icalendar-in-xml/>

The purpose of this specification is to define an XML format that allows iCalendar data to be converted to XML, and then back to iCalendar, without losing any semantic meaning in the data. Anyone creating XML calendar data according to this specification will know that their data can be converted to a valid iCalendar representation as well.
