## Report on Roundtable XXI, May 25-27, 2011

Roundtable XXI took place on May 25-27, 2011, hosted by NASA Ames at Moffett Field, Mountain View, California. The event was attended by 26 people from 16 organizations. The CalConnect Interoperability Test Event was held immediately prior to the Roundtable on May 23-25. Ten people from three organizations were present onsite. plus two more remotely A Workshop on Tasks was held Wednesday afternoon as part of the Roundtable; in addition to the Roundtable participants, several others were present just for the workshop or attended remotely..

The Roundtable was dedicated to technical committee sessions, and informal discussions and networking, with an all-hands Plenary meeting as the last item on Friday afternoon. The Technical Committee sessions were as usual organized sequentially, without competing parallel sessions, as is our standard practice to allow all attendees who wished to be involved in the discussions of each Technical Committee the opportunity to do so.

### SPECIAL EVENTS

A Workshop on Tasks (VTODOs) was held Wednesday afternoon with the goal of determining what needs to be added to iCalendar and related specifications to improve and encourage the use of the standards for task and project management, as well as personal information management.

The host presentation was given by Charlie xxxx, Assistant Project Manager of the Kepler Mission, focused on the scheduling and resource optimization issues (especially concerning the Deep Space Network) encountered with the mission. See [Kepler Mission Operations Scheduling](#).

Friday afternoon we were offered a tour of two simulation facilities, the Future Flight Center and the Crew-Vehicle systems Research Facility.

### DOCUMENTS PUBLISHED OR UPDATED SINCE LAST ROUNDTABLE

#### Published Documents:

- [Event Publishing Extensions to iCalendar](#)
- [Calendar and Scheduling Glossary of Terms Version 2.0](#)
- [Index to Calendar and Scheduling Standards Version 2.0](#)

CalConnect has replaced the internal Interoperability Test Event Report with an internal wiki. CalConnect has replaced the public Interoperability Test Report with a section on the Test Event in

the [CalConnect Minutes](#) newsletter published after each event.

Updated IETF Drafts related to CalConnect (includes updates to published CalConnect documents):

- <http://tools.ietf.org/html/draft-daboo-webdav-sync>
- <http://tools.ietf.org/html/draft-cal-resource-schema>
- <http://tools.ietf.org/html/draft-daboo-et-al-icalendar-in-xml>
- <http://tools.ietf.org/html/draft-daboo-calendar-availability>
